

SINCE 1993

THE ADDRESS OF QUALITY AND RELIABLE PRODUCTION

KARAS PRES was established in Istanbul in 1993 by MUSTAFA KARASU; initially started manufacturing with sanitary equipment, then started to produce all fastening materials with yellow brass materials that appeal to the construction industry.

KARAS PRES has become an institution that is the contract manufacturing assurance of the important companies in the market with its experience, quality and reliability that exceeded a quarter of a century in the following years, During this period, our company which has further improved it's machining and pressing ability; manufactures automobiles, autogas and boiler parts, all sanitary fittings and valve on yellow brass products and processes many types of products such as yellow brass, copper, aluminum and iron on transfer and CNC benches.

WORKING AREA

Hot forging

CNC machining

Mold manufacturing

OUR VISION

Our goal is to contribute to the production values of the companies which we work together and our country by providing quality service to our customers.

QUALITY CERTIFICATION

SERTİFİKA

Sertifika No : 06385/İSM09D
Belgelendirme Karar Tarihi : 21.09.2021
Yeniden Belgelendirme Karar Tarihi : --
Yayın Tarihi : 21.09.2021
Geçerlilik Tarihi : 20.09.2022
Revizyon No / Tarih : 21.09.2021/00

Royalcert, aşağıda bilgileri verilen kuruluşun yönetim sisteminin değerlendirildiğini ve ilgili standardın gereklerine uygun olduğunu onaylar.

DIN EN ISO 9001:2015

Kalite Yönetim Sistemi – Gereksinimler (ISO 9001:2015)

İSMAİL HAKKI METİN KARASU – KARAS PRES KALIP SANAYİ

Dudullu OSB Mahallesi, İmes-107 Sokak, A-Blok Apt. No:36, Ümraniye, İstanbul, TÜRKİYE

Kapsam: Metal İşleme (Musluk, Valf, Vana) İmalatı ve Satışı

SECTORAL AREAS WE PRODUCE OUR CUSTOMERS' PRODUCTS

1. YELLOW BRASS PRODUCTS

1.1. Yellow Sleeves

Yellow sleeves are plumbing products with threaded internal parts that are used to add pipes together in installations. Our company is able to hot forge and machine all products in desired sizes such as 1 ", 2", 1/2 ", 1 1/2" and can offer them to our customers as a final product.

1.2. Brass Nut

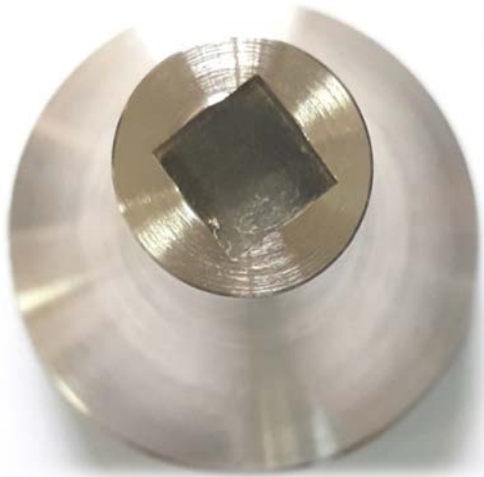

It is hot forged and machined in transfer machines and becomes the usable product in our company.

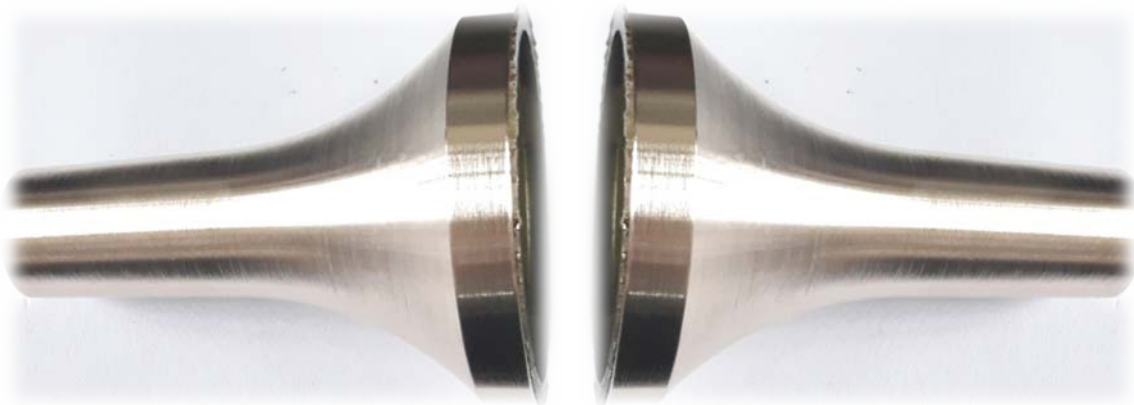

1.3. Bathroom Accessories

1.3.1. Rosetta Handle

The rosette handle used mostly in bath towel rails. It is firstly pressed in pressing department then machined in CNC machines and become ready for use.

1.3.2. The apparatus used in the siphon

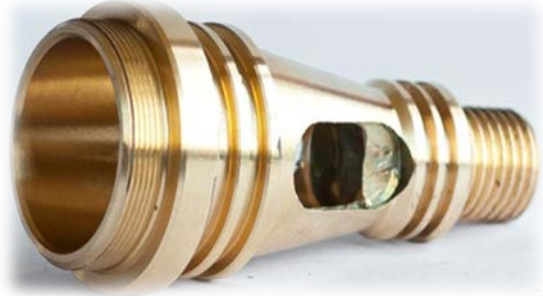

1.4. Gas Filters

It is used as a gas filter in natural gas systems.

1.5. Fire Extinguishing Connector Equipment

1.6. Connectors

1.7. Nipple

Nipple is a connecting product that provides pipe connections. It is produced as double-edged, single-sided and external gear, depending on the installation to be used.

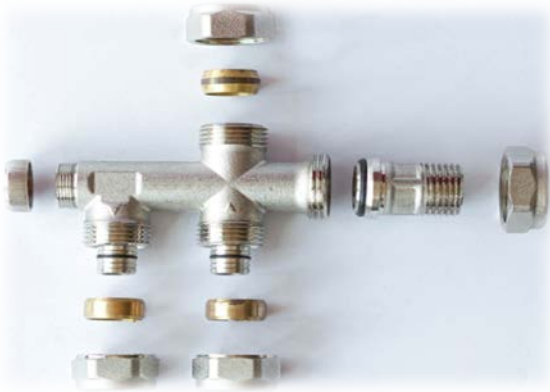

In our company, hot forging is made from yellow brass material, it becomes the final product by machined in CNC and transfer machines.

Usage areas;

Natural gas installations

Building installations

1.8. Radiator Connection Equipments

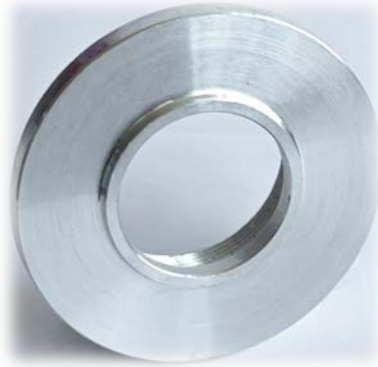

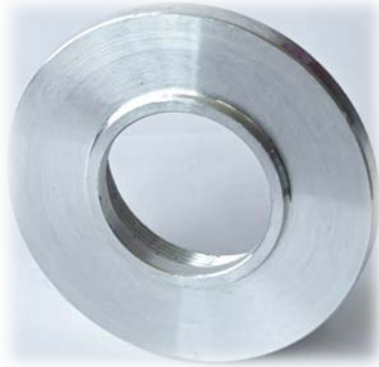

1.9. Tap

2. ALUMINUM MATERIALS

2.1. Machine Sector

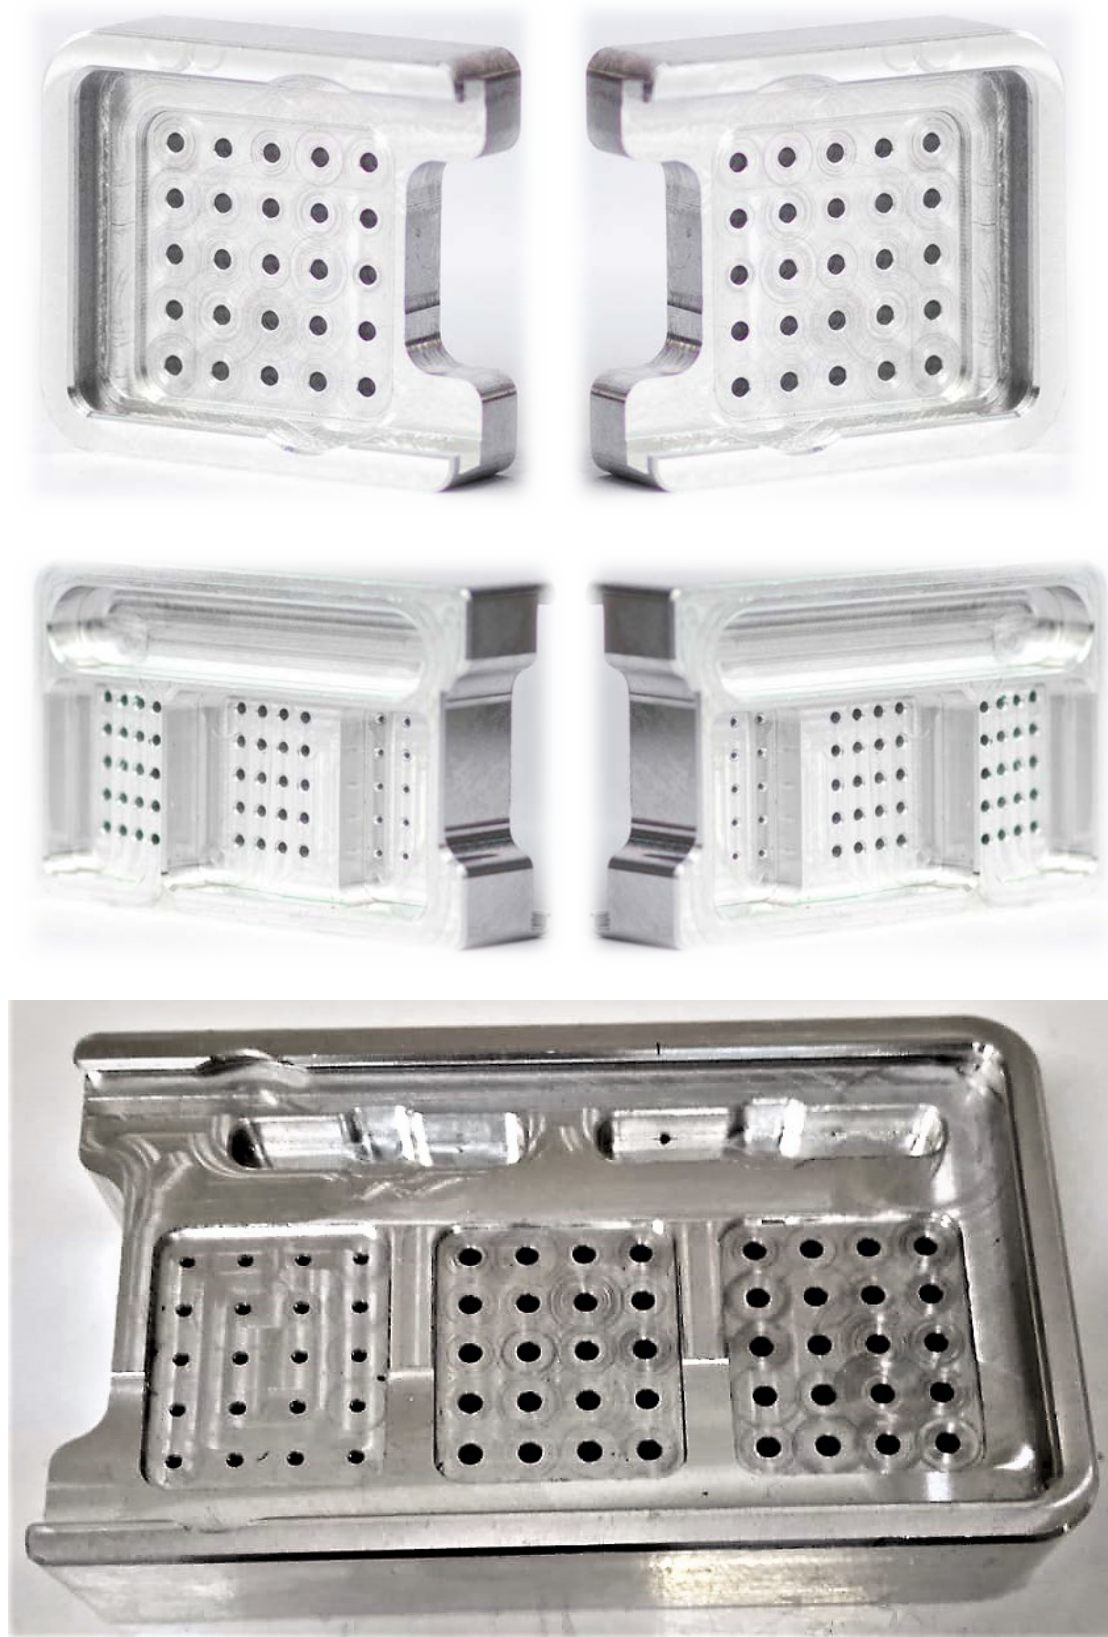

2.2. Electrical (Lightening) Sector

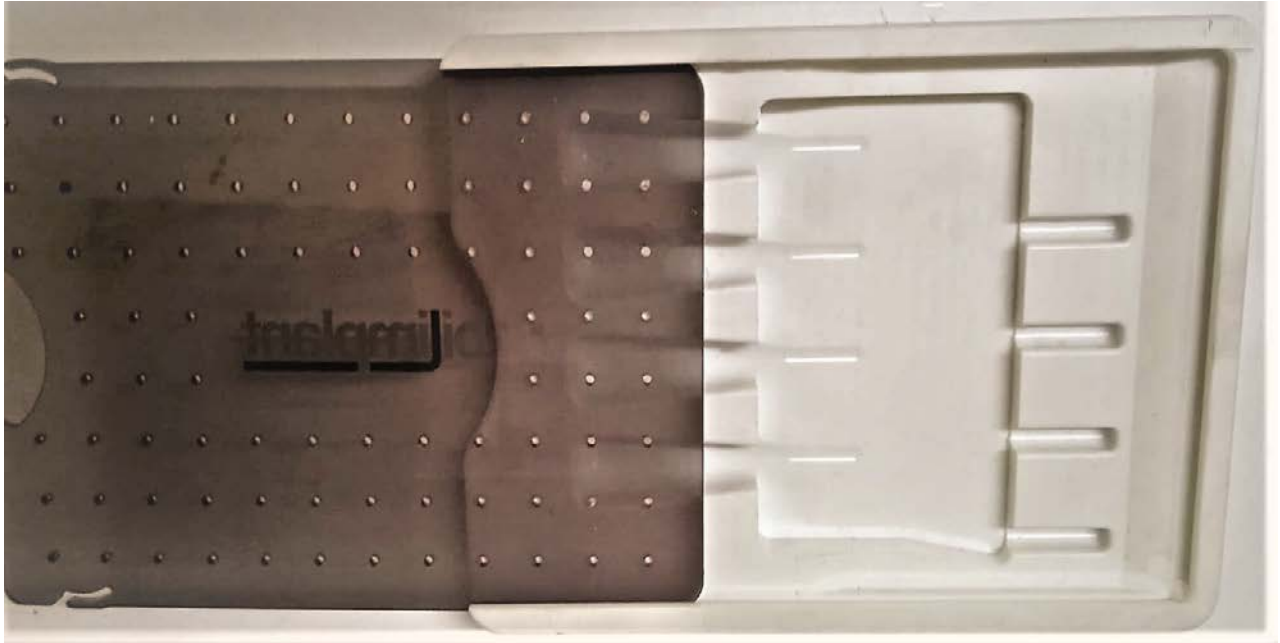

2.3. Dental Sector

3. PLASTIC MATERIALS

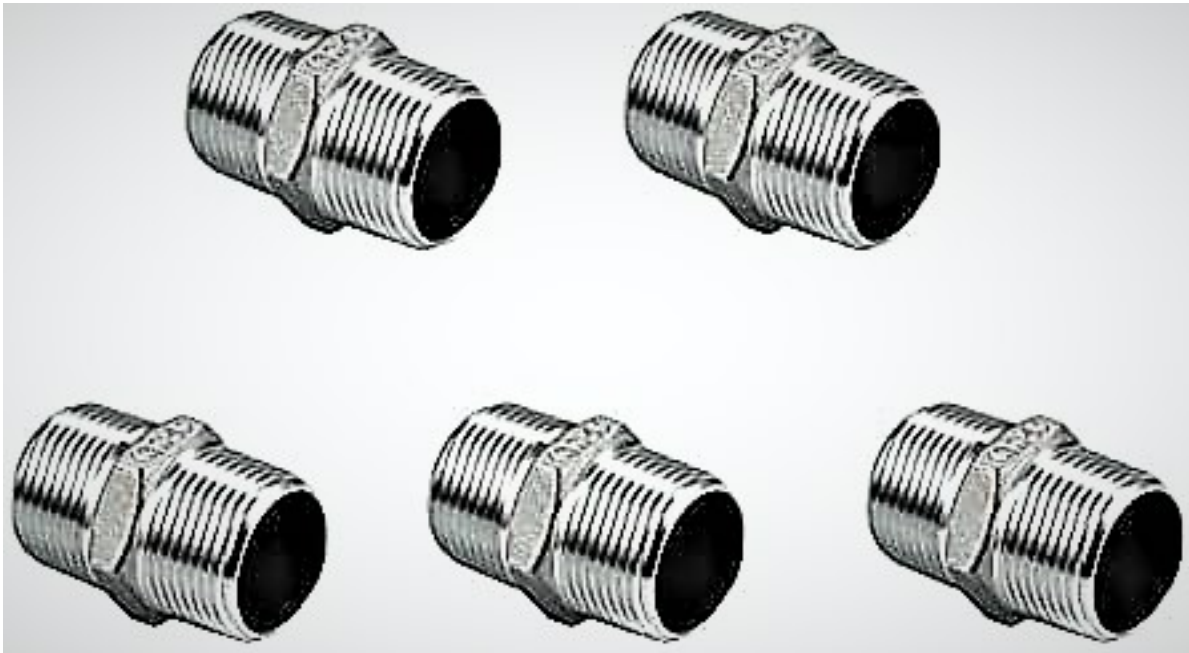

3.1. Dental Sector

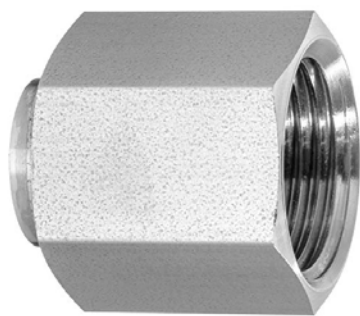

4. STAINLESS STEEL MATERIALS

4.1. Plumbing Sector

We can make all plumbing products in every kind, shape, size and diameter.

Stainless Steel Nipple Material

Pipe Connection Cap

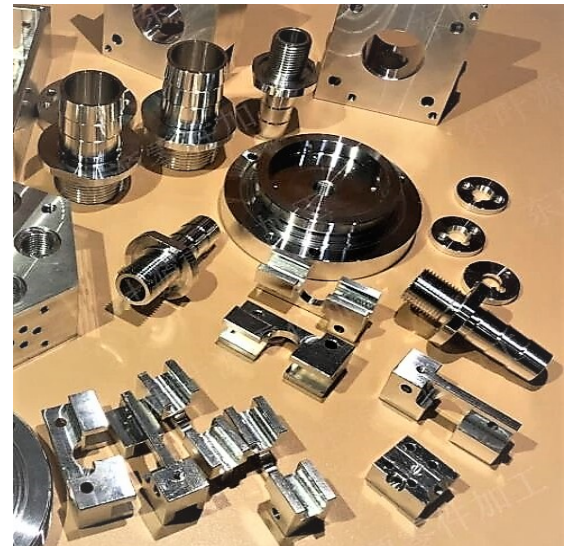

Sealing Material

4.2. Machine Sector

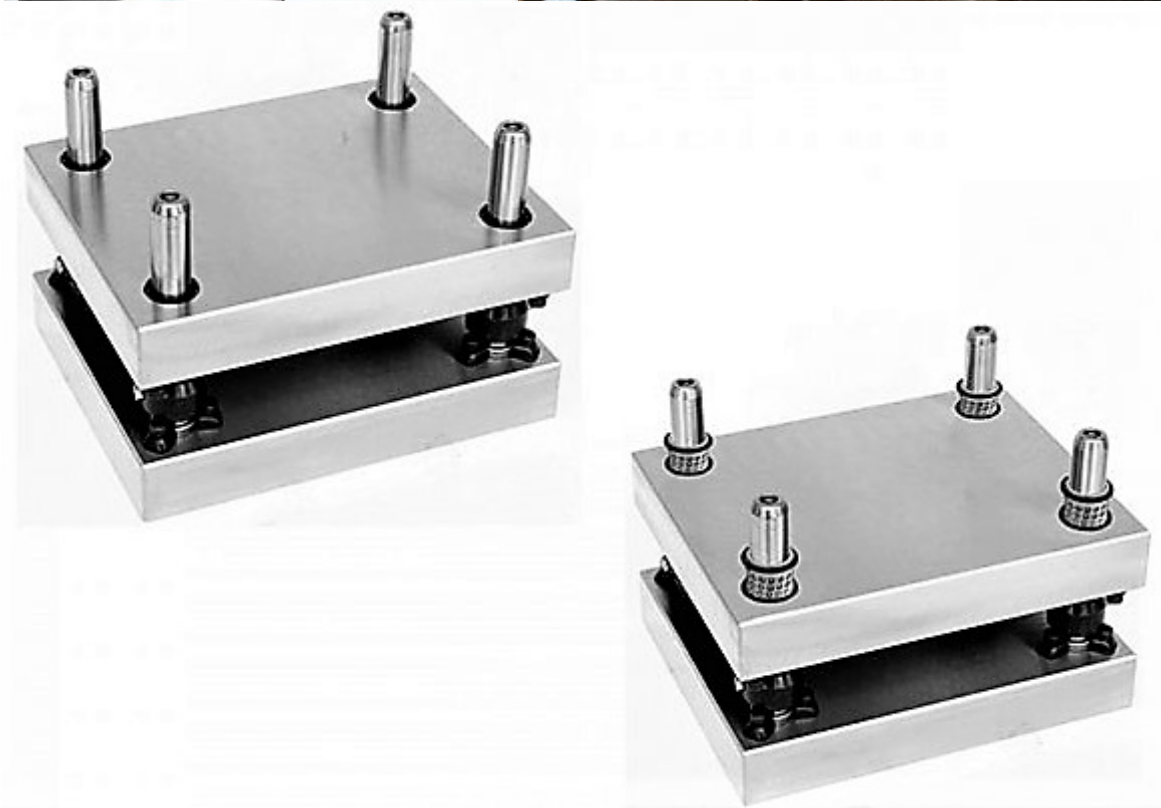

Stainless Steel Machine Fittings

Stainless Steel Machine Spare Parts

4.3. Molds Sector

Stainless Steel Molds
